SECURE YOUR HEALTH COVERAGE

What Health Insurance Usually Covers:

- Doctor visits (primary care & specialists)
- Emergency room visits & urgent care
- Prescription drugs
- Preventive care (screenings, annual exams)
- Hospital stays & surgeries
- Maternity care
- Mental health services

What Health Insurance May Not Cover:

- Dental & vision (often separate plans)
- Alternative treatments (acupuncture, massage, etc.)
- Cosmetic surgery
- Long-term care
- Certain prescription drugs

(Always check your plan's formulary!)

Bonus Tip: If your income changed this year, you may qualify for free or low-cost coverage. Don't assume you're stuck with high premiums.
Need Help Picking a Plan? Book a quick benefits review – we'll find the best coverage for your health and your wallet. [Book My Free Review]

How to Pick the Right Plan:

1. Check if your doctors are in-network
2. Compare deductibles vs monthly premiums
3. Estimate how often you visit the doctor
4. Check for copays on prescriptions & visits
5. If you're self-employed or uninsured, explore ACA subsidies
6. Ask about supplemental coverage (dental, vision, accident)
